**Qualification:** On successful completion of this course, you will be awarded the First Aid Awards Level 2 Award in Oxygen Therapy Administration that lasts for three years.

For best practice and to avoid 'skill fade' we support the HSE recommendation of attending an annual update in first aid.

**Pre-requisites:** Our course consists of practical, hands on approach that will give the learner the ability to deliver Oxygen Therapy in a real life incident.

Learners must be physically able to demonstrate the ability to perform the practical elements of the course.

### **Assessment and certification**

Practical skills are assessed by continuous observation by the trainer and there is a written assessment paper to check understanding.

### **Learners need a basic command of English**

So whilst we are often able to provide support to people who for example do not have English as a first language, our ability to do so is limited by the time available and the number of people who require assistance, although we may be able to make special arrangements if requested in advance.
